Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to optimizing throughput associated with a switch that includes allocating, monitoring and adjusting (managing) peak number sub-streams, classified in class 370, subclass 358.
 - II. Claims 23-30, drawn to a method of traffic signaling associated with an enhanced circuit switch data mobile radio connection, classified in class 455, subclass 461, 443-446 and 555.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group 1 and Group 2 are related as combination and subcombination.

The Inventions are related in that Group 1 optimizes throughput in circuit switch mobile radio, whereas, Group 2 signals changes associated in an enhanced circuit mobile radio switch.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particulars of Group 2, which include using a signaling procedure to signal a change in an enhanced switch and sending information regarding the change on downlink

channels, thereby delaying handover until reception of the change has been acknowledged are not needed to perform a search for Group 1, which included managing and monitoring peak number sub-streams. The subcombination has separate utility such as managing peak sub-streams.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
